VRUSHABH GAWAS

Full Stack Developer

Full-stack web developer leveraging technology to create innovative solutions for positive social impact

WORK EXPERIENCE

- **Software Developer** JUNE 2025 - PRESENT
Lateral Management of Computer Consultants
 - Developed and maintained banking solution applications and API's using ASP.NET and C# to support and improve internal banking operations.
 - Led the full development process, from understanding requirements and designing to coding, testing, and deploying the application into the system.
 - Worked with different teams to understand business needs and turn them into scalable, secure, and high-performance solutions.

PROJECTS

- **Bookify** | bookify-summarization.vercel.app APR 2025
Using React, TypeScript, Python, FastAPI, Firebase and Groq API
 - Bookify is a modern web application that converts PDFs, DOCX, and typed text into AI generated summaries and human like audio.
 - Features includes - audio controls, multilingual support, and a personalized reading library, making learning accessible for visually impaired users, efficient for students and professionals.
- **Athawda Bazaar** | athawda-bazaar.vercel.app DEC 2024
Using Next.js, React, Ts, MongoDB, Js, Vercel, TailwindCss
 - Athawda Bazaar is a Sathaye College event, where interested students set up stalls to sell products and learn business skills.
 - I built a website where users can view stall information and rates falls after registering. On launch day, the website went viral, with 180+ user registrations. consistency across marketing channels and materials.
